

Ensure a quality that meets the highest level of excellence

You are a user of the ATP-metry reagents **DENDRIDIAG®** to monitor the microbial quality of your surfaces (work surfaces, pipes, swimming pools, process components...). To rigorously follow the measurement protocol, an assortment of consumables is needed: a swab, a sampling template and a test tube.

GL BIOCONTROL offers you these complementary products for sale to facilitate the handling of the vendor account group.

These consumables were carefully selected by our research and development department to offer the most reliable analysis possible. They are daily used by our scientific teams.

Developed to meet the range of performances required by microbiology laboratories, these consumables are designed for use on the field. These easy-to-use products are supplied in convenient and safe packages that ensure good resistance to transportation and contamination risks.

Technical specifications

Sampling swabs

Single-use, sterile and ATP-free swab supplied in shockproof round bottom polypropylene tube, with a label sealing the cap.

Dimensions of tube: Ø 13 x 165 mm.

Test tubes

Single-use sterile polypropylene tube. Compatible with several luminometers: KIKKOMAN PD-30 (1 ml), BIOTRACE UniLite (1 ml), SYSTEMSURE (1 ml), KIKKOMAN C-110 (3 ml) or BERTHOLD Jr (3 ml). Please, contact us for further information.

Field of application

The assortment of consumables **BF** is designed to monitor surface cleanliness and presence of biofilm for food and pharmaceutical processes, swimming pools, pipes of cooling tower system and sanitary water production units... These consumables also exist for industrial water (**IW**), sanitary water (**SW**), ultra-pure water (**UPW**) and air (**AIR**). Please, contact us for further information.

Kit content

The two consumables are packed for 100 measurements. Swabs are packed individually to ensure their sterility. Test tubes are sterile and sold in bulk.

Related products

- 1 luminometer (measurement instrument) e.g. model PD-30 of KIKKOMAN,
- ATP-metry reagents **DENDRIDIAG® BF** to monitor surfaces cleanliness.

If you want to use your own plastic consumables, please contact us to verify the compatibility with the luminometer and the **DENDRIDIAG® BF** reagents.
