

MS2

Positive quality control for bacteriophage enumeration

CONTROLE THE QUALITY OF YOUR ANALYZES

ISO 10705-1 requires the analysis of a positive control for each series of sample.

The **MS2 Positive Control** is a freeze-dried water-soluble biological material, containing a specified number of MS2 bacteriophages.

THE MS2 POSITIVE CONTROL FOR A MAXIMUM EFFICIENCY

Save time thanks to ready-to-use tablets

Comply with the standard by using a positive control in each

Only one step simplified by an instant solubilization

Benefit from high precision material

PRACTICAL INFORMATION

Use

- without defrosting
- rehydrate with sterile water

Storage

- temperature: -20°C
- shelf life: 6 months

Content

4 bags of 5 units

Target

Around 120 PFU per vial
