

# MEASURE THE QUANTITY OF BACTERIA IN YOUR WATER IN LESS THAN 10 MINUTES

# TAKE CONTROL

of your water circuit. Avoid production defects and the resulting costs of poor quality.

# ANTICIPATE

microbiological deviations in water quality with a kit offering fast results and high sensitivity.

# SAVE

on manpower and treatment products. Trigger disinfection operations in a reasoned manner.

# MASTER YOUR WATER NETWORK

#### **Monitor**

the microbial quality of your ultra-pure water loops.

#### **Conduct**

your interventions intelligently.

#### **ASSESS**

the efficacy of preventive and corrective treatments.

#### **Identify**

the critical points in no time at all.

# THEY TRUST US

# WHAT IS DENDRIDIAG®?

A turnkey solution to quickly determine the quantity of bacteria in your ultra-pure water networks.

Watch the video

- Dialysis water
- Water for medical and pharmaceutical preparation.
- Water for microelectronic production.

# Analyse eau GL**BIOC©NTROL**

Get the result in a second thanks to the web app!

## A FAST AND RELIABLE ANALYSIS

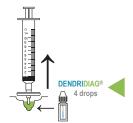

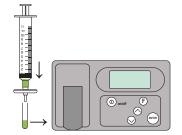

**EXTRACT the ATP** 

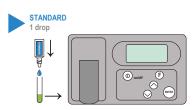

# INDIVIDUAL SUPPORT

- · Remote presentation of the kit
- · Identification of needs
- · Product shipping and scheduling your training date

#### INDIVIDUAL SUPPORT

- · Result analysis assistance
- · Validation of the sampling points
- · Confirmation of the thresholds

1 week

1 month

· On-site or remote training

ROLLOUT

- · Identification of the sampling points
- · Definition of analysis frequency

#### **QUALITY CONTROL**

- Device verification
- Customer feedback

#### Forward planning

# KIT CONTENT

#### The reagents

- 3 DENDRIDIAG droppers
- 3 EXTRACTANT droppers
- 1STANDARD dropper

#### The consumables

- 60 extension tubes and pipettes
- 60 50 ml syringes and 0.45 µm filters
- 60 test tubes

#### The measuring device

- 1 luminometer KIKKOMAN C110
- 1 microtube rack
- 1USB flash drive
